

Saved Artifacts

Artifact	File	Purpose
Trained model	best_model.pkl	The XGBoost model itself
Feature scaler	scaler.pkl	Applies the exact same numeric scaling used in training
Gender / Diabetic / Smoker encoders	label_encoder_*.pkl	Converts each Yes/No or Male/Female value to the same code used in training
Region encoder	region_onehot_encoder.pkl	Expands region into the same one-hot columns used in training
Model metadata	model_metadata.pkl	Stores the test-set MAE (for the app's confidence range) and the exact column order the model expects
