

Correlation with Claim Amount

Field	Correlation with claim	Strength	Note
Blood pressure	0.53	Strongest	Outranks BMI; under-discussed in the project's original framing
BMI	0.20	Moderate	Consistent with the modeling results and the project's original framing
Children	0.06	Weak	No material standalone effect
Age	−0.03	Negligible	Any age effect likely works through interaction with other factors, not a direct linear relationship
