

Data Dictionary

Field	Type	Description	Notes
id	Identifier	Unique record number	Not used as a model input
age	Numeric	Policyholder age in years	Correlation with claim: -0.03 - weak
gender	Category	Male / Female	Label-encoded for modeling
bmi	Numeric	Body mass index	Correlation with claim: 0.20 - moderate
bloodpressure	Numeric	Blood pressure reading	Correlation with claim: 0.53 - the strongest numeric correlate; see Section 6
diabetic	Category	Yes / No	Label-encoded for modeling; weak standalone effect on claim (see Section 6)
children	Numeric	Number of dependent children	Correlation with claim: 0.06 - weak
smoker	Category	Yes / No	Label-encoded for modeling; strongest categorical driver found (~4x average-claim gap)
region	Category	Northeast / Northwest / Southeast / Southwest	One-hot encoded for modeling
claim	Numeric (target)	Insurance claim amount, in dollars	Right-skewed; the value the model predicts
